Portfolio Management & Reporting

Through a centralized command center, oversee portfolios in the full context of the client relationship. Dynamic, configurable metric cards provide key insights at a glance. When it's time to share results, generate professional reports using intuitive drag-and-drop tools or pre-built templates, which you can easily share through your client's portal.

Client Experience & Communications

Launch with a custom-branded, interactive online portal for your clients. Document communications, showcase dynamic portfolio metrics, share documents securely, display aggregated outside accounts, generate balance sheets, and more, ensuring continuity of service during your transition.

Billing & Revenue Management

Start billing your new firm's clients from the very first day. With flexible fee structures and built-in workflows, you can clearly demonstrate your value in a way that aligns with your business and resonates with clients. Streamlined configuration options ensure an efficient process, allowing you to run billing only once per period.

Business Intelligence & Research

Monitor your business's health, uncover trends, and gain deeper visibility into advisor performance and client relationships. With granular permission controls, compliance-ready forms, automated reporting, and more, you get a 360-degree view of your firm, making oversight more efficient and actionable. In addition, access unparalleled data and analytics from Morningstar's Direct Advisory Suite to confidently deliver personalized advice and drive investor success.

The screenshot displays the Black Diamond CRM software interface. On the left, a detailed client profile for 'Rogers, Nick and Katherine' is shown, including sections for Family, Financial Information, and InTouch. The InTouch section tracks service levels, review dates, and contact activity. On the right, an 'Activity' timeline is displayed, showing tasks and events for the current month, with specific items like 'Follow up from last week' and 'Update Internal Systems' listed.

Client Relationship Management (CRM)

Employ a CRM designed specifically for growing wealth management firms.

With a Black Diamond CRM solution, you gain powerful features that are out of the box and have the flexibility to configure for your unique needs. Start strong with tools that help you manage every client relationship effectively at a price that fits growing firms.

Benefits Include:

- Manage every type of client relationship
- View aggregated AUM value
- Automate processes and elevate client service
- Review, filter, and report on the prior day's holdings
- And much more

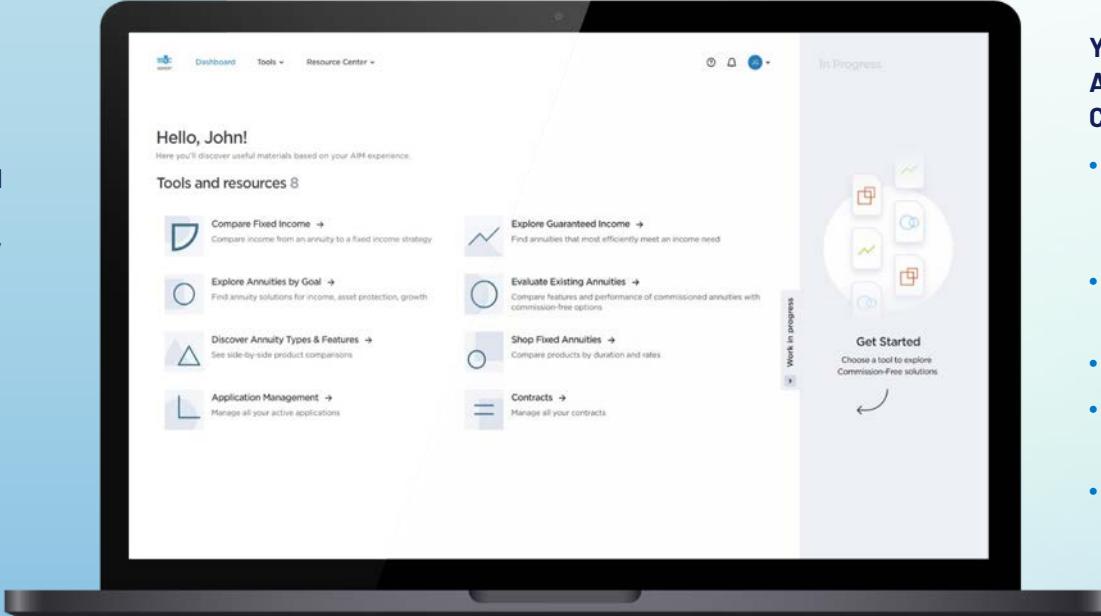

Annuities & Insurance Marketplace (AIM)

High commissions, complex products, and limited technology have traditionally prevented advisors from incorporating insurance into financial plans. Black Diamond eliminates these barriers, enabling your firm to offer commission-free, value-driven products that deliver better client outcomes at lower cost.

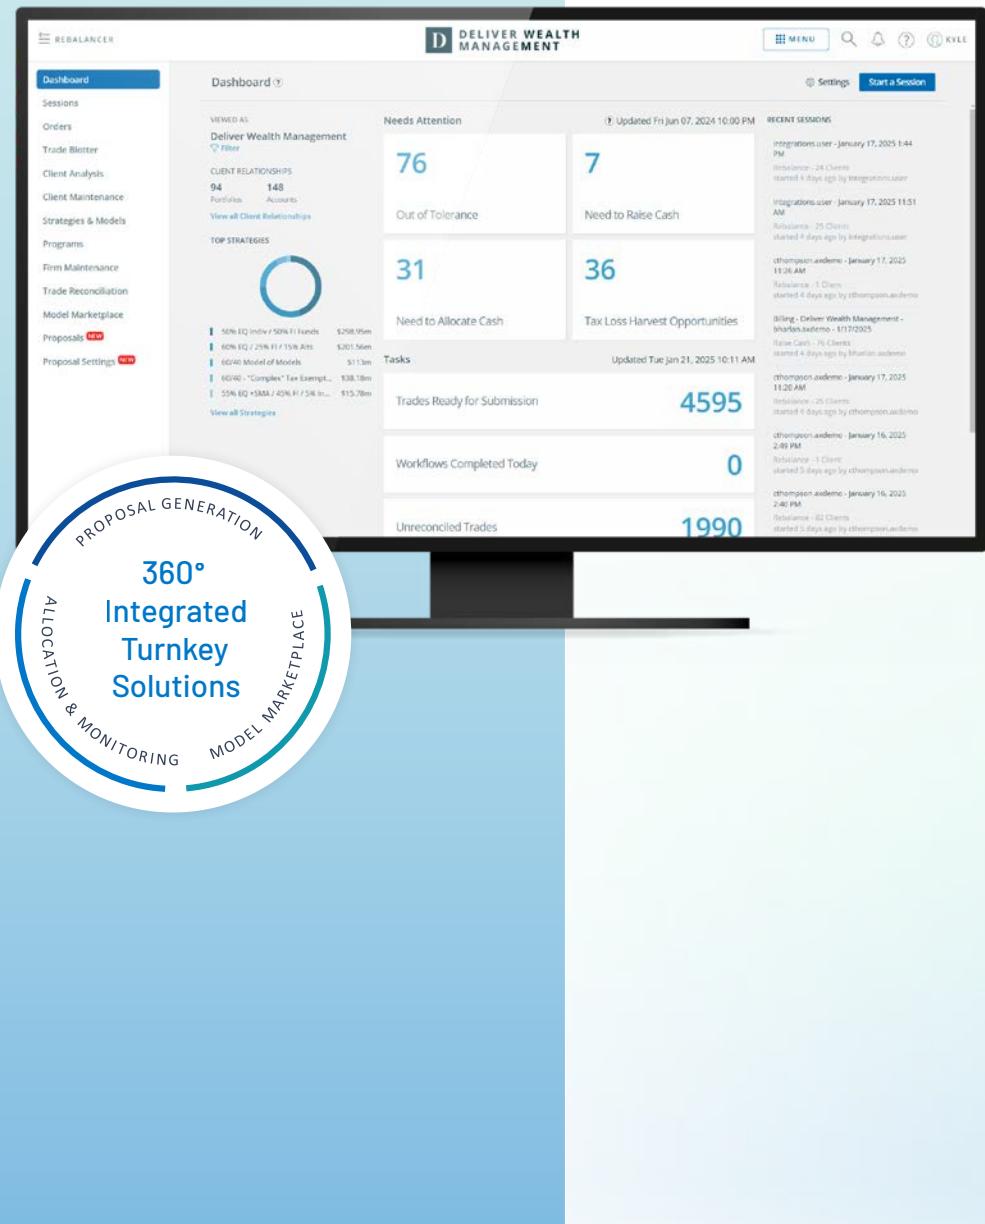

In addition, you do not need to leave your book of annuity assets behind as you break free from your former firm. Through the AIM Breakaway Accelerator Program, you can access complimentary resources to retain control of these assets and your client's experience.

Offered in partnership with DPL Financial Partners, AIM provides you with direct access to fiduciary-friendly insurance and annuities.

You and Your Team Gain Immediate Access to AIM at No Additional Cost, Empowering Them to:

- Repurpose legacy annuities to improve client outcomes in the financial plan
- Bring held-away assets under your fiduciary management
- Mitigate risk in the portfolio
- Deliver guaranteed lifetime income
- And much more

The screenshot shows the Deliver Wealth Management software interface. The dashboard displays various metrics and tasks:
